

# Software Engineer

InterTribal Software Consultants – Durant, OK 74701

## Company Overview:

InterTribal Software Consultants (ISC) is a Software Solutions and Technology Integration company which specializes in consulting and software development for Native American Tribal Governments. We are uniquely positioned to deliver technology solutions to our customers. Software development and consulting is our business.

## Team Overview:

The Product Development Team is responsible for ensuring that InterTribal Software designs, develops and delivers products and solutions that meet our internal and external customers' business needs and provide a significant competitive advantage for InterTribal Software Consultants.

## Role Title:

Software Engineer - This is an intermediate level position where initiative, innovation, and discipline will allow the best candidate to truly set themselves apart.

## Successful Software Engineer Candidates will:

- Take Ownership of assigned projects
- Exhibit professionalism, be disciplined and focused on work to be performed.
- Take initiative for job assignments
- Successfully complete assigned jobs for each work assignment

## Role Description:

The Software Developer will be responsible primarily for the development and maintenance of InterTribal Software applications. This responsibility includes client consulting, software development, and problem resolution. The developer will play a key role in creating, supporting, and maintaining our software products, custom applications and customer websites.

## Qualifications:

- Experience: 1 to 5 years of professional programming experience preferred.
- Familiarity with ASP.Net (C#), SQL Server, HTML, Javascript, JQuery, and CSS.
- Familiarity with object oriented programming and solid database design.
- Education: Bachelor's Degree in Computer Science, Information Systems, or related discipline or equivalent work experience.
- Ability to work with a high energy team.
- Demonstrated ability to assimilate disparate technologies and deliver an appropriate solution to a given task.
- Ability to work in and support a development environment that embraces process and creativity equally.
